

MOHAMMAD ZAID

Software Engineer

PROFESSIONAL SUMMARY

Full Stack .NET Developer with 5+ years of experience in C#, ASP.NET, and .NET Core, building scalable SaaS and enterprise applications. Proven expertise in MS SQL, API development, and performance optimization. Experienced in Agile delivery, DevOps practices, and CI/CD automation using Azure and AWS. Skilled in responsive UI frameworks like Bootstrap, microservices design, and cloud deployment with Docker, Kubernetes, and Azure DevOps. Strong mentor and collaborator, driving quality through code reviews, testing leadership, and technical excellence.

WORK HISTORY

Full Stack Developer, 12/2024 to Current

Domino's Pizza Malaysia - Petaling Jaya, Malaysia

- Upgraded dozens of AKS services to modern Helm charts with Spot compute support across 10+ engineering teams, enabling **thousands of dollars in monthly cloud cost savings** and standardizing deployment practices org-wide.
- Optimized Azure DevOps pipelines by introducing dynamic waits, real-time log streaming, and template refactoring, cutting **deployment times by up to 85%** and accelerating developer feedback loops for critical services.
- Improved platform reliability and operational hygiene by removing ghost/duplicate deployments, and mentoring teams on Kubernetes and Helm best practices, eliminating **hundreds of hours of manual overhead**.

Senior Software Engineer, 09/2024 to 10/2024

Specmatic - Gurgaon, India (Remote)

- Contributed new features in Java and Kotlin, improving user adoption among partner clients by 20%.

Application Developer, 06/2020 to 07/2024

ThoughtWorks - Gurgaon, India

- Built and enhanced microservices (Spring Boot, .NET Core) for a US insurance platform serving **100k+ users**, improving API performance by **20%** and contributing to RBAC, order management, and event workflows.
- Developed React UI components that increased customer portal satisfaction by **15%**.
- Designed a high-volume migration tool that transferred **50M+ records** from legacy systems to Salesforce using AWS S3 and concurrent processing.
